Reg	. No Name:								
	APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY FIRST SEMESTER B.TECH DEGREE EXAMINATION, JULY 2017								
Coı	Course Code: BE101-02 urse Name: INTRODUCTION TO MECHANICAL ENGINEERING SCIENCE	ES.							
Ма	ax. Marks: 100 Duration: 3 Hou	rs							
	PART A								
	Answer any two full questions.								
1.	a) State the difference between extensive, intensive & specific properties. Quote								
	examples.								
	b) What is the essence of first law of thermodynamics? Write down expressions for	(6) or							
	first law applied to a (i) a process (ii) a cycle. What are limitations of first law?	(6)							
	c) What is meant by available energy?	(3)							
2.	a) Explain carnot cycle.	(3)							
	b) A Carnot engine receives 800kJ of heat per cycle from a high temperature reser	, ,							
	at $400^{\circ}C$ and rejects heat at $20^{\circ}C$. Find the theoretical efficiency of the cycle and								
		(6)							
	c) Narrate the history of development of steam engine, steam turbine & hydraulic								
	turbines.	(6)							
3.	a) Sketch and explain the working principle of Francis Turbine.	(5)							
	b) Explain the working of a four stroke SI engine.	(5)							
	c) What are the applications of air compressors? Explain the working principle of								
	centrifugal air compressor.	(5)							
	PART B								
	Answer any two full questions.								
4.	a) Draw the schematic diagram of a vapour compression refrigeration system	and							
	show the process in T-S diagram.	(5)							
	b) Compare the advantages and disadvantages of food preservation using refrigera	tion							
		(5)							
_		(5)							
٥.		(6)							
		(6) (2)							
,		(3)							
6.		(5)							
	b) Draw a block diagram representing the power line from engine to wheel of automobile (Rear wheel drive) and name the components.								
	automobile (real wheel alive) and name the components.	(5)

D B1D109S Pages: 2

c) What	are	the	types	of	gas	turbine	engines	used	in	air	craft	and	write	their	basic
differences.									(5)						

PART C

Answer any two full questions.

7.	a) How engineering materials are classified? Give two examples for each group.	(5)					
	b) Define Crystal Lattice, Unit cell and Packing factor.	(5)					
	c) What is a composite? List four engineered composites and give their applica-						
		(5)					
	d) Draw a typical stress strain curve for mild steel and mark the salient points.	(5)					
8.	a) What are the main mechanical and magnetic properties of materials?	(5)					
	b) List any four Destructive material testing methods and explain.	(5)					
	c) Distinguish between soldering, brazing & welding.	(5)					
	d) What are the different types of flames in Oxy Acetylene gas welding process?						
	Explain.	(5)					
9.	a) With a neat sketch, explain forging operations. Give two specific advantag	es of					
	forging over casting method.	(7)					
	b) Draw the block diagram of a lathe and explain the various lathe operations.	(6)					
	c) List the advantages of CNC machining over conventional machining operation	s.(4)					
	d) Give one example each for a part manufactured by casting, rolling, extrusion a						
	forging.	(3)
